Hi I'm Ahmed.

I'm a freelance designer and developer with a first class degree in Interaction Design. I have strong knowledge of the web design and development industry and my skills include the design and development of web sites, gadgets and rich media adverts. I'm a self-motivated individual, I'm happy to work alone or in a team and believe that it's better to try than to not try at all.

As I am comfortable with both design and development needs, I enjoy the challenge of balancing client and business needs in order to achieve the best outcome possible.

I've got professional knowledge of:

- Server-side: PHP, Python and MySQL
- Client-side: XHTML, CSS, JavaScript, Actionscript and MXML
- Programmes: Photoshop, Illustrator, InDesign, Flash and Flex Builder
- Usability: KISS, Accessibility and interaction design
- Designing: Web sites, YouTube brand channels, Rich-Media adverts (for TABS/GCN) and print media
- Programming: YouTube APIs, GData APIs, Flickr API, Protx 3Dsecure, PayPal API and QTSS

For examples of my work, please visit my web site: www.ahmednuaman.com.
